Southeast Rock Groundwater Contamination Site  
Superfund/Technical Reports

Dear Mr. Wehrmann:

The Illinois Environmental Protection Agency (Illinois EPA) is in the process of Remedial Design (RD) and Remedial Action (RA) for the four source areas described in the Southeast Rockford Groundwater Contamination (SERGC) Site Record of Decision (ROD) signed in June 2002. Illinois EPA per previous discussion and in a letter dated February 2005 has replaced the older flush mounted well MW- 32 located near Source Area 4 at Alton and Horton Avenues in Rockford with a new flush mounted to assist in the monitoring of the ground water monitoring net work. Illinois EPA will also place a new weather resistant lock inside the new mounting. Through its investigation Illinois EPA has determined that this well is located within the right of way access for the City of Rockford. Illinois EPA will continue this procedure as it becomes necessary in the Southeast Rockford Groundwater Contamination network and we will inform you of which monitoring wells may need abandonment or that are altered.

If you have any questions, please feel free to contact me at 815-223-1714 or Terry Ayers at 217-524-3300.

Sincerely,

A handwritten signature in cursive script, appearing to read "Thomas C. Williams".
